

No carpet is stain proof, although many are stain resistant, which allows time for removal.

Scrape

Remove as much of food spills as possible by scraping gently with a spoon or dull knife.

Absorb

Absorb wet spills as quickly as possible by blotting repeatedly with white paper or cloth towels.

Blot

Always blot; never rub or scrub abrasively, as a fuzzy area may result. When blotting, work from the outer edge in toward the centre of the spot to avoid spreading the spill.

Weight

Remove remaining moisture by placing several layers of white towels over the spot and weigh them down with a heavy object that will not transfer colour, such as a plastic jug of water.

Prompt attention to spots and spills is essential. Some spilled materials will stain or discolour carpet if not removed promptly. Other spills can leave a sticky residue that may result in increased soiling if not removed.

Carpet Care & Mattress Maintenance

Like everything in life, a little bit of tender loving care can go a long way. The life of your carpet can be prolonged by a simple maintenance regime. The key to good carpet maintenance is to avoid particles of loose dirt and dust from working their way into the carpet pile where they will act abrasively on the fibres and discolour the carpet.

ASCS use the most thorough carpet cleaning method there is. Some cleaning methods use chemicals that leave a residue on your carpet and cause rapid re-soiling. Our method doesn't leave any residue and is very powerful. It cleans way down to the base of your carpet removing harmful dirt and bacteria, leaving a fresh, clean, healthy carpet which will look good for a long time. We use the best, most powerful equipment on the market and certainly the most efficient in the region.

ASCS Periodic professional carpet cleaning services highly recommend. The frequency of overall cleaning may vary depending on the level and type of traffic and the conditions to which your carpet is exposed. This may range from as little as 6 months to 24 months between cleanings. Your carpet should be properly cleaned at least once every 24 months to maintain its appearance and useful life. **ASCS** recommends only hot water extraction, utilizing carpet cleaning products, equipment, and systems.

Keep the dirt/soil out. Use walk-off mats at entrances and other areas to keep outside dirt and moisture from being tracked onto the carpet. Clean mats frequently. Keep your sidewalks and entrances free of excessive dirt.

CARPET PRE-INSPECTION

We identify carpet fibres, spots & stains, check seams, edges, fitting, etc before carpet cleaning.

VACUUMING YOUR CARPET

We vacuum to remove the dry soil, before cleaning.

PRE-SPOT DIFFICULT STAINS

We will pre-spot your carpet for all difficult stains & carry out specialist stain removal techniques on particularly difficult stains.

APPLY HEAVY-DUTY PRE-SPRAY

A heavy-duty carpet pre-spray is applied specially designed to electro-mechanically lift oily dirt and pollutants from your carpet fibres.

CLEAN WITH HOT-WATER EXTRACTION MACHINE

ASCS high pressure system is used to clean your carpets ensuring deep-down soil removal from your carpet fibres.

HOT WATER EXTRACTION / STEAM CLEANING

Involves loosening spoilage from the pile and extracting the soil suspended in liquid by suction. Machines for commercial cleaning must be capable of producing at least 100lbs per sq. inch pressure with a dual vacuum extraction system to enable maximum liquid recovery. **ASCS** uses 400 PSI.

On synthetic pile carpets we recommend that the machine has a heater to enable the cleaning solution to be heated to a suitable temperature.

DUST MITE REMOVAL

ASCS use a product that will kill dust mites in a safe and efficient way keeping your home safe for your pets and family. Hay fever, asthma and other allergies can make our life uncomfortable and in some cases almost unbearable. We can professionally apply dust mite and allergy products to your carpet upholstery to kill them.

DEODORISING & ODOUR REMOVAL

Micro Bacterial odour removal and sanitisation used to neutralise any human and animal that may be present within your carpets or furnishings.

ASCS provides removal of contaminants & odour. The high heat kills bacteria, fungus, mould, and dust mites, making it the healthiest way to clean carpet. It doesn't leave a soapy residue, if it's done correctly. Detergent residues attract dirt, which will cause your carpet to get dirty much sooner.

HEALTH CHECK

The high pressure steam penetrates to base of the fibres, removing deeply embedded dirt.

The strong vacuum system removes 95% of the moisture, leaving your carpet damp to the touch.

- Hot Steam Clean
- Kill bugs
- Smells fresh
- Perfect for allergy sufferers

KILL THE BACTERIA, FUNGUS, MOULD, AND DUST MITES IN YOUR HOME.

MATTRESS CLEANING

ASCS provides a professional cleaning. We spend a third of lives in our beds and over a period of time mattresses accumulate bacteria, dust mites, pollen, mould and other types of harmful micro organisms. The condition of the mattress can be made worse by humidity.

Health professionals recognise that there are health hazards associated with a dirty mattress. Symptoms range from joint ache, common headaches, hay fever, eczema, asthma, unexplained rashes – and in some cases migraines.
